Price: **€111.00** gross

Manufacturer: Klemp

Referention number: QL026

Information:

The QL026 curtain rail is designed to conceal curtain and track systems in window recesses. Made from high-density PolyForce material, it features exceptional hardness and resistance to mechanical damage while maintaining an optimal weight. Compatible with LED strips - LightGuard® technology ensures even backlighting without material transparency. The internal construction allows for precise and durable adhesive attachment of the light strip. A wide adhesive area on the back ensures stable installation without the need for additional fasteners. Easy cutting simplifies adjusting to individual dimensions. The surface is resistant to moisture and dirt - it requires no special maintenance, just a dry cloth.

Product features

Material	PolyForce
Length	240 cm
Width	10 cm
Collection	Listwy karniszowe
Depth	4,1 cm
Colour	White
Waterproof	Tak
UV Resistance	Tak
Finish	Matowe
