Information:

The MD413 wall strip is designed for decorative finishing of interior walls and works well for framing pictures, photographs, or mirrors. Its compact size and convex profile create a three-dimensional effect without overpowering the overall arrangement. Made from PolyForce material, it is fully resistant to moisture and UV radiation, making it suitable for installation in bathrooms, kitchens, and sunlit spaces. The material is impervious to discoloration and deformation over time. The ScratchShield technology enhances the surface's resistance to scratches and impacts. The factory-applied primer allows for easy painting with water-based paints in any color.
