Information:

The aluminium modular enclosure (80x100x150 cm) is a versatile solution intended for diverse animal species – it is ideal for cats, birds as well as rodents and reptiles. Made of lightweight but sturdy aluminum, the structure ensures durability and stability even for year-round outdoor use. The aluminum enclosure is equipped with weather-resistant netting with a mesh size of 20x20x2 mm. Its modular design allows you to easily expand the enclosure or adjust its size to the available space.
