1400x1400x1400 mm	€6,374.00

Information:

Kee Step® roof access platform is a professional solution providing a safe and stable roof step over platform in any conditions. Anti-slip steps and guardrails minimize accident risks, while the modular structure allows easy adaptation to different roofs and obstacles. The system is available in freestanding, anchored, and custom sizes, ensuring full installation flexibility. Assembly is quick, without welding or roof penetration, preserving roof integrity. Kee Step® meets strict PN-EN, OSHA, and safety standards, ensuring maximum work-at-height safety. It is the ideal freestanding crossover platform and roof access platform for industry, construction, and commercial facilities.
