Information:

Spruce L-Shaped Corner Trim - Robust Protection and Aesthetics

High-quality solid spruce molding designed for effective protection and finishing of wall edges. The smooth sanded surface with a rounded edge ensures an elegant look and safety, while wood drying at 10-12% guarantees durability and dimensional stability.

The A/B grade trim perfectly masks gaps and protects corners from impacts and dirt, e.g., around window or door recesses. Raw wood is ready for painting, varnishing, or staining, allowing for a perfect color match with your interior.

Product features

Material	Spruce
Coating	Untreated wood – for further finishing
Length	200 cm
Mounting method	Construction adhesive or brad nails
