60x30 mm	20	€287.00

Information:

Spruce Unequal Leg Corner Trim - Effective Protection and Aesthetics

High-quality solid spruce molding designed for protecting and finishing wall edges, especially where unequal side coverage is required. The smooth sanded surface with a rounded edge provides an aesthetic look and safety, while a constant moisture level of 10-12% guarantees its durability.

The A/B grade trim perfectly masks gaps and protects corners from impacts and dirt, e.g., when joining panels of different heights or in recesses. Raw wood is ready for painting, varnishing, or staining, allowing for complete freedom in color matching with your interior.

Product features

Material	Spruce
Coating	Untreated wood – for further finishing
Length	240 cm
